VU THI THUY

Engineering Manager

linkedin.com/in/thuy-vu-188263ba | thuyvu1028@gmail.com | Ho Chi Minh | Vietnam

PROFESSIONAL SUMMARY

Engineering Manager with 22+ years in software quality and delivery, including 18+ years leading teams, 10 years at KMS Technology and 7+ years managing cross-functional Agile teams of developers and QA engineers. Builds mobile applications (iOS, Android native, Flutter), web applications (Java, Node.js, Angular) and backends (Ruby, .NET, AWS, Azure Durable Functions) backed by manual and automation QA. Delivers complex programs for international customers (US, Canada, UK, China) from offshore Vietnam and acts as the voice of reason between speed and quality. Domain experience: Entertainment, Sports, Banking, Finance, Insurance, Healthcare, Telecom and Data warehouse. Applies AI in development and testing to reduce cost for clients, strengthen their competitiveness and deliver value faster.

CORE COMPETENCIES

- **Engineering management:** manages multiple Agile teams, sprint backlogs and plans, engineering standards, code quality, and adherence to development and testing guardrails
- **Delivery:** owns milestones, deliverables, risks and dependencies for programs involving multiple onshore and offshore engineering teams; Scrum, Kanban and Waterfall
- **Backlog and sprint management:** owns the offshore backlog and ticket hygiene in Azure DevOps; sprint readiness, execution and completion
- **Capacity and performance management:** aligns sprint commitments with team capacity, tracks developer and QA delivery targets, and escalates issues proactively
- **People leadership:** line management (1:1s, personal development and training plans, career paths, probation and performance reviews), team building, motivation and coaching
- **Agile and DevOps coaching:** continuous improvement, learning-based culture, T-shaped working model, realistic and stretching team objectives
- **Quality and risk:** test strategy, quality gates, QA metrics and reporting; releases to production that comply with customer risk and governance frameworks (Banking and Finance background)
- **Stakeholder management:** communicates at strategic and operational level with customers and internal leadership, balancing business and stakeholder needs
- **Code, release and change management:** release planning and go-live readiness: Jira, Zendesk, Apple Development, Google Deployment

TECHNICAL ENVIRONMENT

- **Languages and frameworks:** Swift, Kotlin, Flutter, Java, Node.js, ReactJS (Redux), Angular, Ruby, .NET
- **Databases:** MongoDB, PostgreSQL; SQL for data verification and ad-hoc reporting
- **DevOps and cloud:** Jenkins, SonarQube, GitHub, CloudFormation; AWS (Lambda, S3, API Gateway), Azure (incl. Durable Functions), multi-cloud
- **Testing:** Selenium, Playwright, Codeception, SoapUI, JMeter
- **Management tools:** Azure DevOps (ADO), Jira, Confluence
- **AI tools:** ChatGPT, Claude (Chat, Cowork, Claude Code)

Understanding of, and experience working with, the technologies above in delivery teams.

PROFESSIONAL EXPERIENCE

KMS Technology Vietnam — 01/2016 – Present

Engineering Manager — 2021 – Present

Lead several projects with up to 25 engineers across different domains and technical stacks for US-based clients, spanning mobile (iOS, Android native, Flutter), web (Java, Node.js, Angular), backend (Ruby, .NET, AWS, Azure Durable Functions) and QA (manual and automation with Selenium and Playwright). Combine the roles of engineering manager, project manager, Scrum Master and test automation manager.

Engineering and delivery leadership

- Work directly with clients/stakeholders to elicit and clarify requirements, and translate them into prioritized, well-sized backlogs for the teams
- Partner with the Delivery Director to shape delivery strategy that keeps each project aligned with the client's key success factors
- Own milestones, deliverables and dependencies; monitor project risks continuously and address them early, before they affect commitments
- Run meetings with US-based stakeholders, reporting progress on epics across the Mobile, Front End and Test Automation teams and highlighting issues that could prevent the teams from meeting their commitments
- Bridge US-based and Vietnam-based engineers, facilitating communication and ensuring the standards set by the Vietnam Engineering team are followed
- Balance speed and quality: define quality gates, control the quality of the product delivered to end users, manage release readiness criteria, ensure the teams follow the SDLC and development and testing best practices, and ensure code is tested and meets the acceptance criteria agreed with US-based stakeholders
- Enforce code quality and testing guardrails through code review, automated regression and static analysis in CI/CD pipelines (Jenkins, SonarQube, GitHub); manage code, release and change processes to meet customer governance and risk requirements

Backlog and sprint management

- Own the offshore product backlog in Azure DevOps – backlog review and refinement
- Ensure the team enters sprint planning ready, with work groomed, estimated and understood; escalate risks before commitments are made
- Monitor sprint progress, address execution risks early and drive stories to completion
- Align sprint commitments with capacity and track developer and QA delivery targets, raising issues to leadership proactively

Scrum Master

- Serve as Scrum Master for the VN teams, facilitating daily stand-ups, sprint planning, sprint reviews and retrospectives
- Lead backlog grooming so that stories are well written, refined and sized, working directly with US-based product owners to understand story requirements
- Coach teams in Scrum and DevOps and lead retrospective-driven initiatives that make development and delivery processes more efficient

Test automation management

- Own the regression strategy and agree test case coverage with US-based stakeholders
- Automate regression test cases for all platforms and run them on a schedule
- Provide dashboards of test case coverage and pass/fail rates, giving stakeholders transparent quality data for release decisions
- Assist with manual testing when needed to protect release dates
- Provide quality metrics for each project and utilize AI in development and testing

People leadership

- Provide line management for developers and QA engineers: 1:1 meetings, personal development and training plans, probation and performance reviews
- Develop team members' career paths through coaching, mentoring and stretch assignments; encourage engineers to cross-skill and take ownership beyond their core discipline
- Build relationships with customers and internal stakeholders; recruit, onboard and mentor team members

Achievements

- Promoted from Senior QA to Acting Engineering Manager (2019) and Engineering Manager (1/2021), growing scope from a 12-member QA team to several projects with up to 25 engineers

Acting Engineering Manager 2019 – 2020

Managed a team of 14 developers and QA engineers that designed and developed a mobile application.

- Led the delivery cycle: sprint planning, estimation, backlog grooming, release planning and customer communication

- Worked three months onsite in the US (02/2019 – 05/2019) with the client to initiate a new mobile and web application project
- Managed iOS and Android native developers, front-end and QA engineers; set priorities, removed blockers and balanced workload
- Ran Scrum ceremonies and defined test strategy, automation scope and quality metrics for the product
- Mentored senior engineers and QA leads, and held performance and career discussions with team members

Senior QA 01/2016 – 2019

Led a QA team of 12 members.

- Created test cases, test suites, test plans and test strategies; performed manual testing and verified quality before releases
- Managed QA members' assignments and coached them to meet acceptance criteria
- Produced QA reports and defined metrics to monitor and improve product and QA quality
- Worked with development teams, product owners and customers to analyse requirements and review test plans

Harvey Nash Vietnam 03/2012 – 01/2016

Senior QC and QC Leader

Worked on web projects in Banking, Insurance, Data warehouse and Sport/Human Management.

- Acted as Scrum Master; worked with BA/BO on requirements and user stories
- Led and coached a QC team of 9, ensuring product quality met acceptance criteria before UAT
- Prepared and reviewed test plans and test cases internally and with clients; built Codeception automation scripts; verified data across data warehouse stages with SQL
- Promoted to QC Leader

CSC Vietnam 01/2011 – 03/2012

Senior Support Analyst and QC Leader

- Worked directly with international customers on requirements, test plans and Healthcare device testing; prepared test reports
- Provided application support (Support Service Line 2) and remote troubleshooting for deployed applications
- Promoted to QC Leader/Co-ordinator with a team of 6

Officience 09/2009 – 01/2011

Project Manager

- Managed 2 projects supporting the Sales department in contract bidding and customer optimization for Telecom services (France Telecom)
- Reported status to the Head of Business Unit; coached the team, set objectives, conducted performance reviews and interviewed candidates
- Project selected as a showcase for presenting to new customers

TMA Solutions 11/2003 – 09/2009

QA/SQA/Consultant and Acting PM

- Tested Telecom software (PBX switches, Call Center, Voice over IP), including 2 years onsite in Ireland (09/2005 – 07/2007)
- Analysed requirements with international customers; developed test strategies, estimations, test plans and test cases; performed manual and automation testing
- Managed resources, recruitment, performance reviews and mentoring; reported to senior management and clients
- Promoted from Senior QC to Consultant, then Acting PM with a team of 14 QCs

EDUCATION AND CERTIFICATIONS

Hanoi Post and Telecommunication Institute of Technology – Major : Telecommunication 1999 – 2002
Hanoi Open University – Major : English Language 2021 – 2024
HCM Post and Telecommunication Institute of Technology – Major : Information Technology 2024 – 2027

Certifications: ISTQB Foundation; Bulats Level C2 (British Council); PMP Preparation (FMIT), PSMI, PSMII, PMI-ACP (2024)

Languages: Vietnamese (native); English (fluent)
